

Numeracy News

Have you ever stopped to think about how many times each day you use maths? During our maths lessons, we always aim to make links with the content we are learning in class and 'real life'. Maths is everywhere!

Students in Miss Parke's maths group have been learning how to count collections of money using effective strategies. They also practised making the same amount of money in different ways. How many ways can you think of to make \$10?

Our Grade 3/4 students are learning about length and area. Students made their own square metres using metre rulers, newspaper and sticky tape. They used the squares to find the area of different shapes. What do you think the approximate area of the hall is?

THIS WEEK'S TALKING POINT...

Last week when some of us wrote the 'short date' at the top of our workbooks on Thursday we noticed something special. The date was 15.3.18. There's something special about a date this week too. Today is 21.3.18. What do you think we noticed about the numbers in each of the dates?
